Technical Specialist, Social Equity & Rights (x2)
Social Equity, Agriculture & Enterprise (SAGE)

“In the past century Fauna & Flora has consistently saved species from extinction and protected habitats from destruction. Their solutions have always been practical, efficient and sustainable in local circumstances.”

Sir David Attenborough,
Fauna & Flora Vice-president
Fauna & Flora

Fauna & Flora saves species from extinction and habitats from destruction, while improving the livelihoods of local people. Our guiding principles are to work with and alongside local partnerships, act as a catalyst for change, make conservation relevant, and base decisions on sound science. Founded in 1903, Fauna & Flora is the world’s longest established international conservation body; our conservation work, and impact, spans the globe.

Social Equity, Agriculture & Enterprise Programme

The work of the Social Equity, Agriculture & Enterprise programme (SAGE) focuses on people-centred and place-based approaches to deliver inclusive, tangible and financially sustainable outcomes for people and nature. With a range of technical expertise, the programme has teams that work across the three inter-related themes of Social Equity & Rights, Sustainable Agriculture and Enterprise & Finance. It supports the development of key local enabling conditions for socially just and economically-viable conservation actions.

SAGE’s work with in-country teams, cross-cutting teams and diverse local partners is central to Fauna & Flora’s delivery of conservation that works with and in support of rightsholders and other stakeholders, to achieve sustainable biodiversity conservation outcomes. It promotes conservation approaches that are co-designed and led by indigenous peoples and local communities, and supports the creation of the necessary tenure, governance, structural and economic conditions for these to succeed.

The SAGE programme supports projects and partner organizations in their efforts to build sustainable livelihoods and pro-conservation behaviours and to deliver sustainable local finance for both livelihoods and conservation. This is delivered through agro-ecology approaches, market systems development, nature-positive enterprise and sustainable finance mechanisms. Improving equity, recognising and respecting rights and increasing governance quality are all critical foundations for the achievement of conservation outcomes that are sustainable in the long-term. All of these are adapted and driven by well-informed understanding of local contexts and priorities.

The programme currently comprises ten staff who play a variety of technical support roles for regional programmes of work alongside the development and collaborative implementation of innovative approaches across SAGE themes. In particular, our Social Equity and Rights focused staff have substantive expertise in community-centred conservation, good governance and gender. These skills are applied within projects to ensure technically strong and holistic approaches to biodiversity conservation that respect human rights and contribute to wellbeing and social equity across Fauna & Flora’s project sites and partner network.

The Opportunity

Fauna & Flora strives to ensure that our conservation goals are achieved equitably, respect human rights and contribute to human well-being. An opportunity has arisen for two Technical Specialists to join the SAGE programme to support the development and implementation of equitable, rights-based and good governance approaches in Fauna & Flora’s Americas & Caribbean and Eurasia
regional programmes. The two roles will work closely together with duties allocated according to the specific skills and experience of the successful applicants.

The primary focus of the role is to support, develop the capacity of, and exchange learning with in-country project staff, partners and other local actors to co-create, implement and learn from projects which deliver equitable and well governed outcomes that improve both human well-being and ecological systems.

You will be a team player with strong technical skills and relevant international experience. Sound technical knowledge and experience of applying rights-based approaches in conservation contexts is a pre-requisite. You will ideally have experience of applying a range of social science research methods in a conservation context, with proven experience in capacity development, project design, and monitoring, evaluation and learning (MEL).

You will have excellent interpersonal and communication skills, including the ability to liaise across teams and cultures. You will enjoy applying your critical thinking to complex issues and explaining these in plain and accessible language. In addition to fluency in written and spoken English, skills in relevant languages are also desirable.

You will have excellent facilitation, training and coaching skills. The ability to plan, organise and prioritise workloads to meet deadlines will be a key attribute.

You should hold a relevant degree or equivalent qualification or experience in international conservation, social sciences, natural resource management or similar field. You will have knowledge of international human rights standards as they apply to conservation, and ideally knowledge and experience of social safeguards.

You should be passionate about supporting others to develop their knowledge and skills while being open to learning and able to quickly pick up new skills. You will have experience of working in a cross-cultural environment and experience in applying your skills to a conservation, development or natural resource management context in less developed countries.

Fauna & Flora is part of Cambridge Conservation Initiative in the David Attenborough Building, providing a great platform for collaboration with other conservation organisations and University of Cambridge departments and institutions. You will be joining a diverse team with global responsibilities at an exciting time as we seek to improve our ability to design, implement, monitor, evaluate and learn from initiatives that have positive impacts on biodiversity while at the same time respecting the rights of Indigenous peoples and local communities and contributing to human well-being and social equity.

This position will be based in Cambridge with international travel as required to meet project needs.

**Terms and Conditions**

**Start Date:** As soon as possible

**Duration of Contract:** Permanent

**Probation Period:** Six months
Gross Salary: £35,000 - £37,500 per annum

Location: Fauna & Flora, Cambridge, UK, with international travel as required. Current policy offers partial remote working within the UK

Benefits: 25 working days’ annual holiday entitlement plus Public/Bank Holidays and any normal working days that fall between 24 December to 1 January inclusive, during which time Fauna & Flora UK offices are closed

For employees on UK-based contracts, Fauna & Flora currently provides a pension contribution of 8% of salary after 3 months’ continuous employment.

Group Life insurance, currently set at a benefit of 4 x basic salary

Hours of Work: This is a full-time position, working 37.5 hours per week, Monday to Friday inclusive.

Job Description

Job title: Technical Specialist, Social Equity & Rights, SAGE

Reporting to: Senior Technical Specialist, Gender, SAGE

Key working relationships: Senior Technical Specialists, Social Equity & Rights
Technical Specialist, Social Safeguards
Social Equity Specialists (Cross-cutting and Regional)
Other members of the SAGE team
Regional Directors and Programme Managers
Design & Impact Team
Relevant cross-cutting team members in Conservation Capacity & Leadership, Climate-Nature Linkages, Corporate Sustainability and Wildlife Trade

Purpose: The primary focus of the role is to support, develop the capacity of, and exchange learning with in-country project staff, partners and other local actors to co-create, implement and learn from projects which deliver equitable and well governed outcomes that improve both human well-being and ecological systems.

Responsibilities:

Implementation & Management
- Be a regional team focal point, providing direct technical input and capacity development support to in-country teams on the social dimensions of conservation interventions, including project design, implementation and social safeguards.
- Identify individuals within regional teams and associated partner organisations to mentor and develop the skillsets necessary to deliver conservation projects in line with Fauna & Flora’s commitments to human rights, good governance and social equity.
• Be the team’s co-focal point on MEL, working closely with SAGE colleagues and our Design & Impact team to contribute to the development of and application of social science research methods from design and implementation to analysis, learning and reporting.
• Co-lead on strengthening regional teams’ and partners’ capacity to monitor and assess the positive and negative impacts of their work on wellbeing, equity and governance, including through access to tools, templates, training and other guidance.

Development & Fundraising
• Proactively seek funding opportunities and work with regional teams and other relevant colleagues to develop technically robust, high quality funding proposals that include appropriate social indicators, activities and budgets.
• Ensure that social issues including safeguard measures are adequately assessed and integrated into new project design.

Learning, Knowledge Management and Communications
• Work closely with other Technical Specialists, including those working on social safeguards and gender, to ensure that in-country practice and experience informs the development of guidance, training, and systems grounded in the realities of the wide range of contexts in which Fauna & Flora works.
• Develop and apply position papers, tools, guidelines, briefing papers and blended learning materials to support internal and external learning and capacity-exchange.
• Contribute to internal and external information-sharing and discussion platforms, including team pages on Fauna & Flora’s intranet, Viva Engage and external website.
• Proactively engage with external stakeholders and peers to ensure that Fauna & Flora is kept abreast of emerging trends and good practice, and ensure that knowledge gained is available across Fauna & Flora and our partners.
• Represent Fauna & Flora’s work to relevant external audiences to share learning, raise our organisational profile, and identify opportunities for new collaborations and funding opportunities.
• In close collaboration with the Communications Team, develop appropriate content for Fauna & Flora’s key communications channels.

Other
• Work in full compliance with Fauna & Flora protocols, ensuring work is done to high quality and within budget.
• With agreement of your Line Manager, carry out any other reasonable duties which are consistent with the role.

Person Specification

<table>
<thead>
<tr>
<th>Skills</th>
<th>Essential</th>

Fauna & Flora Values

Values underpin who we are and how we act. Just as values shape who we are as individuals, they define us as an organisation, creating the culture of success for which Fauna & Flora is renowned. Our people exemplify our shared values, which are interconnected and interdependent:

- We act with integrity
- We are collaborative
- We are committed
- We are inclusive, supportive & respectful
- We get things done
How to Apply

Applications should consist of the following:

- Covering letter confirming your interest and explaining how your experience and skills refer to the role
- Full CV
- Contact details for two referees (who will not be contacted without your permission)

Applications should be submitted to charlie.fisher@fauna-flora.org

Please mark your application ‘Technical Specialist, Social Equity & Rights’, indicate in your covering letter where you saw this position advertised and whether you have a preference to be supporting work in either Eurasia or the Americas & Caribbean.

The closing date for applications is Tuesday, 22 August 2023. Interviews are likely to be held during the week commencing 4 September 2023.

Regrettably, due to limited resources and the high number of applications we receive, we are only able to contact short-listed candidates. If you do not hear from us within four weeks of the closing date, please assume that you have not been successful on this occasion.

Applicants with Disabilities

Fauna & Flora encourages applications from individuals with a disability who are able to carry out the duties of the post. If you have special needs in relation to your application, please contact Jade Bedwell, People Adviser, on Tel: +44 (0)1223 749044 or Email: jade.bedwell@fauna-flora.org

Fauna & Flora values diversity and is committed to equality of opportunity
